

## RISA Webinar Q&A

### Introduction of the RISA-Tekla Link Wednesday, May 8, 2013

---

**Q:** How are angled/skewed and sloping beam connections handled?

**A:** Angled and skewed connections are not yet allowed in RISAConnection. This is on the list for future development.

---

**Q:** I didn't see any HSS tube columns in the model. Does RISAConnection have that capability?

**A:** HSS Connections are currently being added to the program and we anticipate the release at the end of this year.

---

**Q:** Does RISA have the capability to design connections like angles directly connected to another angle without gusset plates?

**A:** RISAConnection doesn't support have custom connections yet. We do plan on adding this capability in the future.
